

B3-2

(a) ~~7.71 =~~ 7.71 =

(b) 3.26 抵抗

(c), (d) $\begin{cases} 100 + 20V_0 = 10k \\ 225 + 30V_0 = 20k \end{cases}$

この系解く。 $V_0 = 2.5 \text{ m}^3/\text{m}^2$ $k = 15 \text{ m}^2/\text{min}$
 $= 0.25 \text{ m}^2/\text{s}$

(e), (f) $V^2 + 2k_0V = kt \quad (*)$

$$V = -V_0 + \sqrt{V_0^2 + kt} = \int u dt$$

よ2 3.26 速度 u は

$$u = \frac{dV}{dt} = \frac{k}{2} (V_0^2 + kt)^{-\frac{1}{2}}$$

よ2 10分後 $u = \underline{0.01 \text{ m}^3/\text{m}^2/\text{s}}$

20分後 $u = \underline{0.0071 \text{ m}^3/\text{m}^2/\text{s}}$

30分後 V は

$$V = -V_0 + \sqrt{V_0^2 + kt} = \underline{18.9 \text{ m}^3/\text{m}^2}$$
